

Articulate Storyline Essentials

Duration : 2 days

Course Overview

Articulate Storyline is an authoring software used to build interactive content for online learning. It empowers you to create custom e-learning courses that adapt seamlessly to various devices, including desktops, laptops, tablets, and smartphones. With Storyline 360, you can easily design engaging interactions, personalise content, and deliver high-quality training experiences across different platforms.

During this course delegates will learn how to use Storyline to create effective and interactive eLearning projects either for desktop or mobile devices. The course covers software simulation, handling videos and creating question surveys.

Prerequisites

Delegates should be confident users of a pc and a good knowledge of the MS Office applications (Word, Excel and PowerPoint) would be an advantage.

Objectives

During this course delegates will learn how to:

- Navigate the Storyline environment
- Create a new project from scratch or from PowerPoint
- Add images, animation, text, audio and video to slides.
- Record narration
- Create question surveys
- Produce surveys with graded questions
- Record the screen and simulate software
- Publish a project for desktop and mobile distribution

Course Content

Getting to Know Storyline

Looking at the Storyline interface

Working With Text

- Adding Text Boxes
- Editing Text
- Formatting Text
- Formatting Text Boxes

Adding Graphics

- Pictures
- Shapes and Captions
- Screenshots
- Characters

Media and other content

- Audio
- Video
- Web Objects
- Lightboxes
- Markers
- Scrolling Panels
- Zoom Regions
- Hyperlinks
- Buttons

Working with Objects

- Formatting Objects
- Object properties
- Timing Objects with the Timeline
- Animations

Arranging Objects

- Resizing Objects
- Rotating Objects
- Moving Objects
- Aligning Objects
- Changing Layering Order

States & Layers

- Working with States
- Working with Layers

Questions & Quizzes

- Understanding Quiz Types
- Question Types
- Adding Questions
- Question Options
- Feedback, Scoring and Branching
- Results Slides
- Quiz Options
- Randomising questions with Question Banks
- Drag-and-Drop Interactions

The Player

- Player Overview
- Adding Features
- Menu
- Resources
- Glossary
- Colours & Effects

Screen Recordings

- Preparing for Your Recording
- Record Settings
- Creating a Recording
- Playback Mode Options
- Inserting Recordings
- View Mode
- Try and Test Mode
- Reusing Recordings

Publishing

- Publishing Process
- Publishing to a Learning Management System
- Publishing and Tracking options
- Post-Publish options
- Other Publishing format
